## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 22-24 continue to be rejected under 35 U.S.C. 102(e) as being anticipated by Thompson et al. '758. Thompson et al. disclose an intravascular assembly for forming a continuous lesion in a chamber of a patient's heart comprising an elongated delivery member (26), a distal section shapeable into a curved configuration (Figure 3a), an elongated depression along one side of the distal section, an elongated support element (52) which is fixed along a length of the distal section, an elongated electrophysiological device (12) disposed within the delivery member having a distal end secured within the distal end of the delivery member and having a plurality of emitting electrodes (28). **Regarding claim 24** see col. 8 lines 37-38.

### ***Response to Arguments***

Applicant's arguments filed 7/14/03 have been fully considered but they are not persuasive. Applicant argues that based on a 4/08/96 priority date, Thompson et al.

Art Unit: 3739

cannot be considered as prior art. In addition, Applicant is currently attempting to redefine the elongated opening (28) as the elongated depression.

In the present application examined claims 22-24 are directed towards the embodiment including an elongated depression, which is specifically disclosed on page 10 line 9 and illustrated in Figures 23-24. The Applicant has not disclosed an elongated depression in reference to Figures 1-3 hence this subject matter is not contained in the 5,863,291 patent. Therefore, applicant is given a priority date of 10/29/98 for the pending claims. Hence, Thompson et al. can be considered as prior art in regards to the pending claims.
